

Q My hairstylist and colourist suggest I use professional shampoo and conditioners from my salon. What benefits do they give?

A 'Your colourist and stylist have been through years of training so it's wise to take their advice,' says Kelly Small. 'If you have coloured hair and want to keep it looking fresh, then I suggest the Color Save range from System Professional, which is available from Wella Professional salons. The Color Save Shampoo £12, Conditioner £14, Mask, £19.50, and Color Finish £7.66, are specially designed to protect your hair against colour fading while prolonging the intensity of the colour to give long lasting brilliance.'

Q My hair colour always looks amazingly shiny after I've been to the salon. How do I get the same shine at home?

A 'I recommend using the System Professional haircare range,' says Anya Dellicompagni. 'The SP Shine Define products deliver instant sheen while smoothing the hair for flawless, light reflection. If you blow dry your hair, use a heat protection product such as SP Trend Set, £9.19, on damp hair and point the hairdryer down the hair shaft to ensure that the cuticle lies flat. Finish the style with a shimmer product to help hair continue to shine, such as SP Gloss On, £17.19.'

Q I've recently had my hair coloured red but I want it to stay looking vibrant.

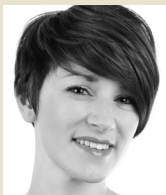

What's your advice?

A 'It all comes down to how you care and protect your colour on a daily basis,' says Darren Messias. Using colour protection products

such as SP Color Save range, is important. If you use straighteners, curling tongs or blow-dry your hair, spritz on a heat protection spray. I like SP High Hair Flat Iron Spray, £10.29, which locks the colour molecules into the hair and protects against colour-fading. I'd also

recommend booking a salon SP Hair Alchemy Treatment. Your hairdresser will mix the appropriate SP Infusion and Mask to create a treatment that is unique to your hair needs and desires, for unrivalled hair perfection and colour that shines with brilliance.
